DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 44 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Morgan (4,635,096).

Morgan discloses in figure 1, a system for generating one or more wave form output streams, including a memory (38) for storing a plurality of waveform segments, a plurality of queues (26-32) for receiving waveforms segments form the memory, and one or more output interfaces (324,34, RAM OUT) for reading waveform segments from the queues as claimed.

3. Claims 1-43 are allowed.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
